SUMMARY

Frontend engineer and team lead with three years building accessible, high-performance interfaces in React, Next.js and TypeScript for fintech, GPS/IoT and AI platforms. I treat WCAG compliance and Core Web Vitals as delivery requirements rather than cleanup work, most recently taking a production site from Lighthouse 68 to 100 across all four categories in a seven-day solo sprint. I build real-time and map-based interfaces, role-aware dashboards and motion that respects reduced-motion settings, and I take a product full stack when it needs to ship end to end.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, shadcn/ui, Radix UI, Vue 3, Redux Toolkit, TanStack Query, React Hook Form, Zod

Performance and accessibility: Lighthouse, Core Web Vitals (LCP, INP, CLS), WCAG 2.2 AA, semantic HTML and ARIA, keyboard and screen-reader support, code splitting, image and font loading

Motion and design: GSAP, Framer Motion, Figma, FlutterFlow, design systems

Real-time and maps: WebSockets (Socket.io), Mapbox GL, Mapbox GL Draw, Turf.js

Full stack: Node.js, NestJS, Prisma, MySQL, MongoDB, Supabase, REST, Docker, NGINX, GitHub Actions, Vercel

Collaboration: team leadership, mentoring and intern supervision, code review, technical writing, stakeholder communication, remote delivery

EXPERIENCE

SafulPay | Freetown, Sierra Leone

Frontend Engineer · Feb 2024 to Present

Digital payments platform with 10,000+ users and 1,300+ agents on iOS and Android.

- Raised the corporate website's Lighthouse scores from 68 to 100 in all four categories in a seven-day solo sprint, by re-platforming it to Next.js with code splitting, lazy loading, image optimisation and accessibility fixes, while adding new sections in the same pass.
- Led and built the agency banking dashboard that field marketers use to onboard and verify agents and merchants, with KYC document capture, role-scoped views, activity monitoring and a performance leaderboard, supporting a network of 1,300+ agents.
- Engineered the v2 frontend architecture in React and TypeScript with the Go backend team, covering API contracts, authenticated sessions and complex client state, after co-building the v1 app in FlutterFlow.
- Converted complex Figma designs into pixel-accurate, WCAG-accessible components for customer portals and agency dashboards, keeping interaction patterns consistent across four product surfaces.

Tech N' Goodwill Limited | Freetown, Sierra Leone

Frontend Engineer and Team Lead · May 2023 to Present

Software company of 25 staff. Incubated SafulPay before its 2025 spin-off; builds Trakkam.

- Lead the 6-person engineering and IT team across 6+ web applications, and trained and mentored 15+ engineers and interns through onboarding, code review and technical direction.
- Built the Trakkam fleet-tracking frontend (trakkam.com) in Next.js and TypeScript: live WebSocket vehicle tracking, Mapbox geofence drawing, trip playback, an alerts inbox, and a different interface for each tier of a 7-tier role model.
- Took Trakkam full stack (NestJS, Prisma, MariaDB, NGINX, GitHub Actions on a $5/month VPS), keeping operating cost about 8x lower than the equivalent managed setup.

- Set shared performance and accessibility standards across the team's projects, carrying WCAG-compliant component patterns and Lighthouse budgets from one build to the next, and added security scanning to CI that took production dependency vulnerabilities from 104 to 0.
- Cut code review turnaround by 30% by standardising Git and GitHub workflows with structured pull requests and review gates.

Nimble Capital Limited | Abeokuta, Nigeria

IT Specialist · Feb 2021 to Dec 2022

- Ran day-to-day technical operations, keeping systems up and supporting staff across endpoints and internal tools.
- Ran email and SMS campaigns and collected structured customer feedback for product iteration.

PROJECTS

MarketGist | Next.js, Inngest, MongoDB, Gemini · marketgist.vercel.app

- Stock dashboard with watchlists, price alerts and AI news summaries from background jobs.

Khariar | Next.js, Gemini API, PDF.js · khariar.vercel.app

- AI applicant-tracking and career platform with resume parsing and defensive handling of model output.

A Certain Woman | Next.js, Tailwind CSS, shadcn/ui · acertainwoman.org

- Eleven-section editorial site for a nonprofit, with an audio player, lightboxes and keyboard-accessible components.

Resolve | Next.js, TypeScript · resolve.vote

- E-voting platform for organisations, built in a cross-functional HNG 12 team, with election management, invitation-only access and Google sign-in.

CERTIFICATIONS

- HNG 12 Internship, Frontend Track Finalist, top 432 of 11,285 participants, Apr 2025.
- AltSchool Africa Frontend Engineering diploma, 95/100, Feb 2024.
- Google Cybersecurity Professional Certificate, Google via Coursera, Jul 2026.
- Udemy: The Ultimate React Course (React, Next.js, Redux), Dec 2024; The Complete JavaScript Course: From Zero to Expert, Jun 2026.
- Coursera: Learning How to Learn, Nov 2024.

EDUCATION

- **Higher Diploma in Science in Computing (NFQ Level 8)**, Griffith College, Dublin, Ireland · admitted, Feb 2027 to Feb 2028
- **Diploma in Frontend Engineering**, AltSchool Africa, Lagos, Nigeria · Mar 2023 to Feb 2024 · 95/100
- **BSc Animal Nutrition**, Federal University of Agriculture, Abeokuta, Nigeria · Sep 2016 to Oct 2021
