

# OYINLOLA IBRAHIM LAWAL

## SOFTWARE DEVELOPER (FRONTEND ENGINEER)

[lawaloyinlola.com](http://lawaloyinlola.com) | [ln/lawaloyinlola](https://ln/lawaloyinlola) | [github/@lawalOyinlola](https://github.com/lawalOyinlola) | [oyinlolalawal1705@gmail.com](mailto:oyinlolalawal1705@gmail.com) | [+234 8163992628](tel:+2348163992628)

---

Frontend Engineer with extensive experience building high-performance, accessible, and scalable user interfaces for FinTech, GPS/IOT, and AI-powered platforms. Proficient in React, Next.js, and TypeScript, with a proven track record of translating complex Figma designs into pixel-perfect, WCAG-compliant components. Adept at leading cross-functional teams, optimizing application load times, and when the product calls for it, I can extend into backend, real-time, and self-hosted infrastructure to ship end-to-end.

---

## SKILLS

- **Languages & Frameworks:** TypeScript, JavaScript, React, Next.js, Vue, Node.js, NestJS.
  - **Styling & UI:** Tailwind CSS, Shadcn/ui, Radix UI, Base UI, GSAP, Framer Motion, Flutterflow, HTML5, CSS3.
  - **State Data & APIs:** Redux, Zustand, React Hook Form, Zod, TanStack Query/Table, REST, WebSocket (Socket.io).
  - **Maps & Geospatial:** Mapbox GL, Mapbox GL Draw, Turf.js.
  - **Tooling & Workflow:** Git/GitHub workflows, CI/CD (GitHub Actions), Vite, Webpack, Lighthouse, Web Vitals.
  - **Adjacent Stack:** NestJS, Prisma, MariaDB, NGINX, Docker (used in shipping full-stack features)
- 

## PROFESSIONAL EXPERIENCE

### Tech N' Goodwill Limited

Aug 2023 – Present

#### Frontend Developer & Team lead

Freetown, Sierra Leone

- Directed cross-functional teams (UI/UX, marketing, backend) across 6+ web applications, including incubating **SafulPay** as an internal product before its spin-off as a standalone fintech company.
- Owned the frontend for **Trakkam**, a multi-tenant GPS fleet-management SaaS; built in Next.js 16, TypeScript, Tailwind, and shadcn/ui, with interactive Mapbox geofencing, real-time WebSocket vehicle tracking, and a 7-tier role-based access model.
- Extended into the full stack to ship Trakkam end-to-end (NestJS API, Prisma, self-hosted Traccar, NGINX, PM2, GitHub Actions CI/CD on a \$5/month VPS), keeping the team lean and operational cost ~8× lower than the equivalent managed setup.
- Standardized Git/GitHub workflows and implemented structured pull requests, driving a 30% reduction in code review turnaround and accelerating feature delivery.
- Authored product tutorials and component documentation to ensure reliable cross-functional collaboration and rapid onboarding.

### SafulPay

Feb 2024 - Present

#### Software/Frontend Developer

Freetown, Sierra Leone

- Re-platformed the SafulPay corporate website to Next.js (from the prior React/TypeScript version), raising **Lighthouse scores from 68 to a perfect 100** across Performance, Accessibility, Best Practices, and SEO while simultaneously shipping additional sections and content, through code-splitting, lazy loading, image optimization, and accessibility hardening.
- Engineered the SafulPay v2 frontend architecture, collaborating with Golang backend engineers on API consumption and complex state management, after co-developing the v1 stack that paired a FlutterFlow frontend with a centralized PHP backend.
- Built the **SafulPay Agent & Merchant Onboarding** web app — used by field marketers to register and onboard agents and merchants, with analytics dashboards, activity monitoring, and a performance ranking/leaderboard system for tracking marketer productivity.

## HNG Internship

Jan 2025 - Apr 2025

### Frontend Engineer Intern

Lagos, Nigeria (Remote)

- Co-engineered the frontend for [Resolve](#), a high-stakes voting platform, in Next.js, TypeScript, Tailwind, and shadcn/ui. Focused on accessibility and seamless state management.
- Built an AI text-processing application in React + TypeScript, using Chrome Origin Trials APIs for real-time language detection, with strong Web Vitals across all builds.
- Delivered accessible, responsive UI; contributed to code reviews and cross-functional feature development.

## AltSchool Africa

March 2023 - March 2024

### Interim Developer

Lagos, Nigeria (Remote)

- Intensive, Education-driven internship covering frontend engineering fundamentals, modern tooling, team collaboration practices and soft skills.
- Shipped two production projects [Task Pilot](#) - a Vue 3 + Reka UI task manager with screenshot export and LZ-compressed shareable task URLs (no backend required); and [ScissorsWeb](#) - a React + TypeScript + Supabase URL shortener with emoji slugs, custom aliases, QR-code generation, and click/device/geo analytics.
- Practiced disciplined Git/GitHub workflows and wrote comprehensive unit tests to enforce code quality.

## Nimble Capital Limited

Feb 2019 – Dec 2021

### IT Specialist

Abeokuta, Nigeria

- Oversaw day-to-day technical operations and executed digital marketing campaigns (email/SMS), collecting customer feedback to drive product iteration. ensuring uptime and rapid bug resolution.

---

## EDUCATION

### Diploma In Frontend Engineering

2023 – 2024

AltSchool Africa, Lagos, Nigeria

### BSc In Animal Nutrition

2013 – 2020

Federal University of Agriculture, Abeokuta, Nigeria

---

## TRAINING AND CERTIFICATION

- Udemy: The Ultimate React Course: React, Next.js, Redux & More,
- HNG Internship: Frontend Development Track (2025)
- Udemy: The Complete JavaScript Course: From Zero to Expert,
- Coursera: Learning How to Learn,
- Udemy: Build Responsive Real-World Websites with HTML and CSS,

---

## SELECTED PROJECTS

### Khariar (AI-Powered ATS & Career Platform) | Next.js, TypeScript, Gemini API

Live: [khariar.vercel.app](https://khariar.vercel.app) | GitHub: [lawalOyinlola/khariar](https://github.com/lawalOyinlola/khariar)

Architected a highly interactive career platform integrating the Gemini AI API for real-time, dynamic resume evaluation with ATS optimization and personalized feedback.

### MarketGist (AI-Powered Market Analysis Platform) | Next.js, TypeScript, Better Auth, Inngest

Live: [marketgist.vercel.app](https://marketgist.vercel.app) | GitHub: [lawalOyinlola/marketGist](https://github.com/lawalOyinlola/marketGist)

A market-analysis platform with interactive charts, real-time data visualization, and AI-generated news summaries, delivering actionable intelligence for investors and analysts.
